About me

Going out in the middle of a small village where there was not even a nearby primary school, making your way through academic excellence is the embodiment of unparalleled courage. This is what Nasser is.

Skills

French

English

Javascript-TypeScript

Node.js

React

GraphQL

Next.js

Angular

Ionic

Spring boot

Education

2015-2019	Electrical Engineer <i>Electrical Engineer</i>	EHTP CASABLANCA
2013-2015	Preparatory classes Maths and physics	CPGE Acharif Elidrissi Taza
2013	Baccalaureate Mathematical Sciences-A	Ibn khaldoun High School Karia Ba Mohamed

Experience

Apr 20	Research And Development Engineer MEAN/MERN Stack	4D
2019-2020	Development Engineer MEAN Stack	Weenko
2019	Pfe internship Sizing tool for lightning rod installations	JESA

Projects

4D	ScoCloud For Sco cloud we are developing a plugin that benefits from functionalities of the Kaseya VSA big solution in the cloud management (It runs as plugin of Kaseya). Each customer of the SCO Cloud could manage their own resources easily (virtual machines, networks, virtual datacenters, ...)	Node.js/ React.js/TypeScript
4D	Vcloud Connector In order to interact vcloud director API we developed this connector to perform different operations easily such as creating virtual machines, virtual datacenters, ...	TypeScript
Side project	Finance Planet Training University (Morocco) decided to automate their process of managing their financial transactions with their clients. So I developed a solution to help them manage different operation automatically such as handling monthly bills, notifying clients about their payments monthly, registering a new student in the financial records	Node.js/React.js
Side project	Deliberation of notes I developed a deliberation application for A Private university in order to help them deliberate their students. The application has access to the database and that's all what it needs in order to make it easier for the professors and administration to handle the process for deliberating each student easily.	Spring Boot/ React.js
4D	4D-CLI Redundant tasks are the hardest to perform, That's Why 4D gave me the mission to develop a command line interface (CLI) to avoid redundant work. Now the only task for the architect is to prepare templates and the CLI will do the rest.	TypeScript
4D	MBM project Multicultural Bible Ministry(MBM) wanted to have a strong backend to perform different statistical operations, an easy user interface to read and visualize their data. We developed This application using the 4D database. The people in charge can visualize, create transactions, interpret graphs ...	Node.js/ Angular 9/ Ionic 5
4D	4D Connector In order to make Node.js applications interact with 4D databases. We have developed this product to perform queries on data classes and collections, to easily apply server methods, ...	Node.js/ TypeScript
